GLOBAL FOAM COMPANY

CUSTOM CUT FOAM

Global Foam Company has been in business since 1997. Two partners designed and built their first computer-controlled foam cutting machine for cutting patterns on investment castings to within +/- .005 inches.

We have since diversified and now provide custom precise-cut foam patterns and shapes for several applications: architecture, signs, concrete forms, amusement parks, displays/exhibits, from wedding columns to concrete bridge detailing.

Global Foam Company produces unfinished items for EIFS (Exterior Insulation Finish Systems). The shapes we create can be cut from our library of files, or we can produce from customer generated ideas. Usable files include 2D and 3D CAD files, dimensioned layouts, photos, hand sketches or renderings, clip art profiles and letter fonts.

Exceeding customer expectations is our primary goal.

Please Note: All work is CUSTOM CUT

Responsibility

When you submit a Design it is the responsibility of the purchaser/specifier. The designer is responsible for all decisions pertaining to the design, detail capability, drawings, etc. Global Foam Company is not liable for any errors in these areas.

CUSTOM CUT FOAM

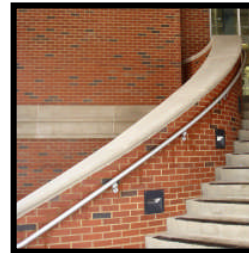

Highway Forms

This decorative detailing for a new interchange overpass pier at I-70 and I-75 just north of Dayton, Ohio, celebrates Dayton's heritage as the birthplace of flight and its continuing role in the evolution of aviation. Global can create concrete relief forms to fit any need and any design, from abstract pattern to the detailed, realistic representations shown in the photo.

Panels, Voids and Concrete Railing Form

For industrial or construction applications, the possibilities are endless. In this application, Global Foam Company provided the foam forms that created the elegant arches within the bridge. The bridge was built on site around the foam forms.

CUSTOM CUT FOAM

Retaining Wall, Symbols and Murals

For industrial or construction applications, the possibilities are endless. Global Foam Company provided the foam forms for the Wall mural located at I-70 and I-75 Interchange by Greater Dayton International Airport in Ohio.

Bronze Cast Forms

Whether working with individuals, sculptors. Global Foam manufactures Forms for interior and exterior decorative ornamentation to provide special detailing appropriate to all types of applications. These forms were made for Mike Major – local sculptor.
